Unit 1 Project-Climate Research

Directions:
After researching the weather and climate for the city you have chosen, summarize the climate below.

1. How much rain/snow does the area receive over the course of the year?
   ______________________________________________________________________________
   ______________________________________________________________________________

2. What is the temperature of the area like?
   ______________________________________________________________________________
   ______________________________________________________________________________

3. Does the temperature change over the course of the year? Describe how.
   ______________________________________________________________________________
   ______________________________________________________________________________

4. Are there any other extreme conditions that may impact the design of a home in the area?
   ______________________________________________________________________________
   ______________________________________________________________________________

5. What is the most interesting factor about the climate of the area?
   ______________________________________________________________________________
   ______________________________________________________________________________

6. What aspects of the climate would most impact the design of a home?
   ______________________________________________________________________________
   ______________________________________________________________________________
